consonance

CONSONANCE BY OPERA AUDIO REFERENCE CD-2.2 LINEAR

Opera Audio celebrates this entry into the no/no bit streams with the [Consonance Reference 2.2 Linear](#) which uses passive I/V conversion and a 16-bit TDA1543 DAC with JFETs for an op-amp-

less analog reconstruction filter with a 2.35V output. The latter model adds more upscale styling and a 6H30-based valve output stage.

In the spec wars, the 2.2 Linear already seems a winner before any listening commences: a claimed >100dB S/N ratio, <100dB cross talk and THD of < 0.12%. Warranty is 1 year and 90 days on the tube.
